Since 1898 Southbend has been dedicated to providing the highest quality and most innovative cooking equipment to customers in all facets of the food service industry. Customers choose Southbend due to the reliable performance, endless versatility and pricing value of the equipment.

Utility Information

- Total BTU for equipment is total of all gas related selections.
- Gas connection will be located on opposite side of optional griddle/charbroiler location (if optional griddle/charbroiler is located on the left, the gas connection will be moved to the right side).
- One 3/4" male gas connection.
- Required minimum inlet pressure is Natural Gas 7" W.C. or Propane Gas 10" W.C.
- If using Flex-Hose, the I.D. should not be smaller than the I.D. of the manifold of the unit to which it is being connected.
- If the unit is connected directly to the outside flue, and A.G.A approved down draft diverter must be installed at the flue outlet of the oven.
- Check local codes for fire and sanitary regulations.
- For gas models with convection ovens, standard 120/60/1 are furnished with 6' cord with 3-prong plug (Total max amps 5.9 per convection oven base). Optional 208/60/1, 50/60/1 phase is available and supply must be wired to junction box with terminal block located at rear (Total max amps 2.7).
- For models with optional hybrid electric standard ovens, 208/60/1-39 amps. 220/60/1-37 amps, 240/60/1-34 amps.
- For models with optional hybrid electric convection ovens, standard 208/60/1-32 amps. 220/60/1-31 amps, 240/60/1-27 amps.

Miscellaneous Information

- If using Flex-Hose, the I.D. should not be smaller than 3/4" and must comply with ANSI Z 21.69
- If casters are used with flex hose, a restraining device should be used to eliminate undue strain on the flex hose
- For installation on combustible floors 6" high legs or casters are required. Minimum clearance from combustible construction is 10" on sides and rear for all units except charbroilers. Charbroiler units are for use in noncombustible locations ONLY.
- Rear clearance to noncombustible construction is 10" for charbroilers and 0" for all other tops and bases. Side clearance to noncombustible constructions is 0" on all units.
- Recommended - Install under vented hood
- Check local codes for fire, installation and sanitary regulations.
- If the unit is connected directly to the outside flue, an A.G.A approved down draft diverter must be installed at the flue outlet of the oven.
- Two speed motors are not available on Restaurant Range Convection Ovens.
